ESET Mail Security for Microsoft Exchange Server integrates a powerful antivirus and antispam protection that makes sure that all harmful email-borne content is filtered away at the server level.

With our solution, you get a full protection of the server - including the server's own file system. You can apply policies for specific content based on the real file type, and monitor the security status or fine-tune the configuration via the ESET Remote Administrator tool.

<b>Antivirus and Antispyware</b>	Scans all inbound and outbound POP3, SMTP and IMAP traffic Filters email-borne threats, including spyware at the gateway level Provides all tools for full-fledged server protection, including the resident shield and on-demand scanner Powered by the advanced ThreatSense® technology combining speed, accuracy and minimal system impact
<b>Antispam</b>	Stops spam and phishing messages with high interception rates Improved antispam engine allows to define antispam threshold scores with greater precision All antispam settings are fully integrated in the product's GUI Real file type detection - lets admin apply policies for specific type of content in e-mail attachments
<b>Remote Administration</b>	ESET Mail Security for MS Exchange is compatible with ESET Remote Administrator Offers a set of pre-defined actions in response to scanning results Allows you to remotely deploy, manage, update and report on all instances of ESET security software in the company network
<b>Logs &amp; Statistics</b>	Lets you keep abreast of security status with detailed and comprehensive logs and statistics Spam logs - Displays sender, recipient, spam score, classification reason and action taken Greylisting log - Displays greylisted sender, recipient, action taken and status Allows to monitor server performance in real time
<b>Smooth Operation</b>	Automatically excludes critical server files from scanning (including Microsoft Exchange folders) The built-in license manager automatically merges two or more licenses with the same customer name Improved installer supports migration of all previous version settings (v4.2 or v4.3) eShell command line control lets the admin run scripts to perform actions or create/modify configurations
<b>Enhanced Quarantine</b>	Allows to create separate quarantine configurations for individual mailboxes
