Antivirus and Antispyware

Eliminates all types of threats including viruses, rootkits, worms and spyware
Provides real-time on-access scanning of the server-stored data
Powered by the advanced ThreatSense® technology combining speed, accuracy and minimal system impact

Cross-platform Protection

Eliminates malware targeting all platforms, including Windows, Mac and Linux operating systems
Prevents malware from spreading from one platform to another

Low System Demands

Delivers proven protection while leaving more system resources for the server's vital tasks

Remote Administration

Compatible with ESET Remote Administrator and supports management through a web interface
Gives you the option to schedule on-demand scans, actions and security tasks
Allows you to customise log details and modify reports and notifications to help you monitor compliance with company security standards

Distribution-Independent Solution

ESET provides installers for the most popular distributions of Unix-based systems, including the 'Ready' variations of RedHat and SuSE that comply with the File-System-Hierarchy standard
Requires no external libraries except for LIBC
